

Lake Chabot's Largemouth Bass population is thriving thanks to active management and volunteer efforts to create critical habitat through our Habitat Enhancement Program. Every January we host a volunteer work day to install Christmas tree reefs that provide critical habitat for Largemouth Bass as well as many other fish and invertebrates. If you would like to join us, please call Pete Alexander, Fisheries Program Manager at (510)544-2342.

EBRPD still recommends capture, care and release of all Largemouth Bass. Please record weight, length and tag number if present and let the kiosk or marina know! Thanks for your help and enjoy the fight!
